For over 100 years, Leonardo has designed world-leading airborne electronic warfare solutions that have helped save lives of aircrews on operations around the world. Our BritcCloud decoy represents the most significant advance in radar-guided missile countermeasures since the advent of chaff. Learn more about BritcCloud The Eye of the Typhoon

Electronic Warfare - Leonardo in the UK

Electronic warfare is any action involving the use of the electromagnetic spectrum or directed energy to control the spectrum, attack an enemy, or impede enemy assaults. The purpose of electronic warfare is to deny the opponent the advantage of, and ensure friendly unimpeded access to, the EM spectrum. EW can be applied from air, sea, land, and/or space by manned and unmanned systems, and can target humans, communication, radar, or other assets.

Electronic warfare - Wikipedia

Anti-submarine warfare (ASW, or in older form A/S) is a branch of underwater warfare that uses surface warships, aircraft, submarines, or other platforms, to find, track, and deter, damage, and/or destroy enemy submarines.Such operations are typically carried out to protecting friendly shipping and coastal facilities from submarine attacks and to overcome blockades.

Anti-submarine warfare - Wikipedia

Yet there are numerous means and methods for improving aircraft survivability, all with various strengths and weaknesses, risks and opportunities.1 Airborne electronic warfare (EW), especially when coupled with stealth or low observable (LO) technology, appears to be one of the most effective techniques for increasing aircraft and aircrew survivability in hostile environments.

SearchWorks

Much of the recent EW dialogue has focused on airborne electronic warfare capabilities: the Navy's and USMC's EA-6B Prowlers and EA-18G Growlers, and the Air Force's EC-130 Compass Call missions. Those aircraft fly at 30,000 feet or higher in support of deep strike and bombing missions.

Short History of US Army Electronic Warfare | SITREP

Electronic jamming is a form of electronic warfare where jammers radiate interfering signals toward an enemy's radar, blocking the receiver with highly concentrated energy signals. The two main technique styles are noise techniques and repeater techniques. The three types of noise jamming are spot, sweep, and barrage.

Radar jamming and deception - Wikipedia

Electronic Warfare came into its own during the Second World War where it was used extensively by the Allies against the German air navigation systems used to guide the Luftwaffe in night raids. This was termed as 'The Battle of the Beams'. There are several other examples of its use. However, the Tobruk (Africa) Campaign is well documented.

Electronic Warfare: Emerging Trends in Technology

Electronic Warfare (EW) & Self Protection Enhance the survivability of your helicopter platforms during operations in hostile, multi-spectral weapon systems environments. ELTA's Integrated Electronic Warfare & Protection Suite has been designed to enable helicopters to defend themselves against both surface-to-air and air-to-air weapon systems.

Airborne SIGINT & Electronic Warfare (EW)

"Lockheed Martin performed ground-based testing for the U.S. Army's Multi-Function Electronic Warfare-Air Large system at an Army test center that included electronic attack and electronic warfare support against several communications and non-communications targets," Dave Wagner, senior program manager of cyber and electronic warfare at Lockheed, told C4ISRNET in an Oct. 13 interview.
