5.8 Applications of Rational

Expressions. The last thing we want to do with Rational Expressions is the last thing we always want to do when we learn a new topic. That is, we want to talk about applications to the real world. In this case, we will only deal with two different types of word problems. They are problems that involve a moving object, and problems that involve work.

World Problems Answers can help you answer questions about how to combine workers or machines to complete a job on schedule. An important step in solving rational equations is to reject any extraneous solutions from the final answer.

~~Solving Rational Equations and Applications~~

In this section, the applications will often involve the key word “reciprocal.” . When this is the case, we will see that the algebraic setup results in a rational equation.

Example 1: A positive integer is 4 less than another. The sum of the reciprocals of the two positive integers is $\frac{10}{21}$. Find the two integers.
